## Asset-based Financing

# Greystone Business Credit (GBC)

---

Greystone Business Credit (GBC) is the asset-based lending arm of Greystone. GBC is a nationwide commercial finance and factoring company that provides funds collateralized by accounts receivable, inventory, and by equipment and real estate. We grant loans ranging from \$500,000 to \$10,000,000. We serve small and mid-size companies, across almost all industries, including manufacturers, service companies and distributors. Our clients are companies that require funding in excess of their bank facilities or those unable to arrange conventional financing. By concentrating on collateral rather than relying on the borrower's financial statements, Greystone uses innovative structuring and customized solutions to assist its clients in achieving their goals.
